ACKNOWLEDGEMENTS

The ongoing success of this international clinical audit is dependent on the hard work and commitment of a large number of individuals working within the paediatric intensive care community. We are very grateful to all the audit clerks, secretaries, nurses and doctors who support and contribute to the Paediatric Intensive Care Audit Network (PICANet) from their own paediatric intensive care units (PICUs).

PICANet was established in collaboration with the Paediatric Intensive Care Society (PICS) and their active support continues to be a key component of our successful progress. The PICANet Steering Group (SG) has patient, academic, clinical, government and NHS members all of whom are thanked for their continuing assistance and advice. Members of the Clinical Advisory Group (CAG) provide a formal interface between PICANet and clinical care teams and their valuable support and contribution is gratefully acknowledged.

We are also grateful for the support and commitment given by members of the PIC Families Group.

For the period of this report PICANet was funded by the National Clinical Audit & Patient Outcomes Programme, administered by the Healthcare Quality Improvement Partnership (HQIP), Welsh Health Specialised Services Committee Specialised Services, NHS Lothian/National Service Division NHS Scotland, the Royal Belfast Hospital for Sick Children, Our Lady's Children's Hospital, Crumlin and the Children's University Hospital, Temple Street from Dublin, Ireland and The Harley Street Clinic.

FOREWORD

This is the second PICANet National report for Northern Ireland which covers January 2010 to December 2012. It includes data from nearly 1600 Intensive Care admissions of patients whose normal place of residence is within Northern Ireland. Within this year's report there has been a continued increase in the number of admissions, with over 80% receiving care in the Royal Belfast Hospital for Sick Children. As in the previous report, nearly half (47%) of admissions are under one year of age and the male to female ratio is 1.3:1. These figures are similar to those seen in the general PICANet population. Compared to last year the crude mortality rate has fallen to 3.8% and both the adjusted and unadjusted SMR's fall well within acceptable levels. The low overall rate of emergency readmission within 48 hours of 1.3% also suggests appropriate timing of discharge.

Collecting all this data can, at times, feel like a pointless task during one of the many busy days that we all 'enjoy' in PICU. However as an example of how valuable PICANet data can prove to be, we have recently secured additional funding to increase PICU bed numbers within the Royal Belfast Hospital for Sick Children from 8 to 12 beds commencing January 2014. This increased capacity will result in fewer cancelled elective surgical procedures and fewer children requiring out of region transfer to receive Intensive Care. In addition the additional funding will allow for the expansion of the Paediatric transport service to provide 24/7 cover for all children within Northern Ireland. This would not be possible without the continued and on-going efforts of medical, nursing and administrative staff of the Intensive Care units. So it is with thanks to all those staff and PICANet that we have accurate data that we can use to help ensure the best possible care is received by the children of Northern Ireland.

DR MARK TERRIS

CONSULTANT PAEDIATRIC ANAESTHESIA/INTENSIVE CARE

ROYAL BELFAST HOSPITAL FOR SICK CHILDREN

EXECUTIVE SUMMARY

This report is based on children admitted to paediatric intensive care units in the United Kingdom or the Republic of Ireland whose usual place of residence is Northern Ireland, this is the second Northern Ireland report from PICANet.

The format has changed since the last report, in keeping with the Annual Report and so have some of the contents; tables 23-25 have been dropped and new outcome measures added, ventilator free days (Table 46a) and emergency readmissions within 2 days of discharge (Table 46b).

- Data are presented on 1595 paediatric intensive care admissions over the three year period 1 January 2010 – 31 December 2012.
- There has been an increase in the number of admissions of children for PIC, year on year, from 507 in 2010 to 529 in 2011 and to 559 in 2012.
- Nearly half (47%) of admissions are under one year of age and the male to female ratio is 1.3:1. These figures are similar to those seen in the general PICANet population.
- Cardiovascular diagnoses account for only 17% of admissions, substantially lower than the proportion in PICANet generally (29%).
- More than 80% of paediatric intensive care admissions for Northern Irish children are to the Royal Group of Hospitals HSS Trust in Belfast, and about half of the remaining children (7% of the total) are admitted to the Birmingham Children's Hospital NHS Trust.
- Prevalence for admission varies modestly between Health and Social Care Trusts. Overall prevalence is comparable to other parts of the United Kingdom.
- Unplanned admissions accounted for 61 % of all admissions.
- 61% of admissions received invasive ventilation.
- 9,996 bed days were provided for Northern Irish children treated in paediatric intensive care, 61% of which were received by patients under one year of age.
- Crude mortality for Northern Irish children treated in paediatric intensive care is 3.8%, again similar to the overall figure.

DATA INCLUDED

This report is based on children admitted to paediatric intensive care units in the United Kingdom or the Republic of Ireland whose usual place of residence is Northern Ireland. The data are presented for the three year period January 2010 – December 2012. All data are based on admissions aged 0 – 15 years unless clearly stated otherwise.

There are 31 participating NHS trusts or other governing bodies (located in the United Kingdom and Republic of Ireland, and referred to in this report as Health Organisations, or simply Organisations), 27 of whom collected data for the entire reporting period. In 2010 PICANet began reporting from two units in the Republic of Ireland.

This report should be read in conjunction with the National Report of the Paediatric Intensive Care Audit Network National Report January 2010 - December 2012 (published September 2013: Universities of Leeds and Leicester. ISBN 978 0 85316 326 8), which can be downloaded from www.picanet.org.uk

ADMISSIONS BY PRIMARY DIAGNOSTIC GROUP

The primary reason for admission has been categorised into 13 diagnostic groups to enable a simple comparison between organisations. The classification is based on CT3 (The Read Codes). The groups are mutually exclusive:

- Infection excludes any respiratory or gastrointestinal infection but includes meningitis.
- Neurological disorders include neurovascular complications.
- Oncology includes neuro-oncology (brain tumours).
- Other includes those diagnoses not covered by the other 12 groups.

Read codes are five characters in length and can be made up of numbers, letters, or periods. The ordering of the individual characters does not indicate the hierarchy (e.g. patent ductus arteriosus (P70..) is a subset of congenital abnormality of ductus arteriosus (Xa6aC)).

ADMISSIONS BY NORTHERN IRELAND HEALTH AND SOCIAL CARE TRUST

The number of admissions by Northern Ireland Health and Social Care Trust (HSCT), which replaced the previous Health Boards during the period of this report, was obtained by linking the validated postcodes of children admitted to PICU to Trust using the Postcode Directory. For children admitted to PICUs in the Republic of Ireland, Trust was identified from the address, where provided.

ADMISSIONS BY ADMISSION TYPE

We have used the following definitions for admission type:

- An admission that is *planned - following surgery* is one that the unit is aware of before the surgery begins or one that could have been delayed for 24 hours without risk (e.g. spinal surgery).
- An admission that is *unplanned - following surgery* is one that the unit was not aware of before surgery began and one that could not have been delayed without risk (e.g. bleeding tonsillectomy).
- A *planned - other* admission is any other planned admission that is not an emergency (e.g. liver biopsy).
- An *unplanned - other* admission is one that the unit was not expecting and is therefore an emergency admission (e.g. status epilepticus).

Surgery is defined as undergoing all or part of a procedure or anaesthesia for a procedure in an operating theatre or anaesthetic room. Patients admitted from the operating theatre where surgery is not the main reason for admission (e.g. a patient with a head injury who is admitted from theatre after insertion of an ICP monitor) are not included here. In such patients the main reason for admission is head injury and thus the admission type would be *unplanned - other*.

RETRIEVAL DATA

Data are collected on whether or not a child was retrieved / transferred into the PICU. We have used the following definitions:

- *Own team* identifies that the team from the admitting hospital collected the child from the referring hospital.
- *Other specialist team (PICU)* identifies that another PICU retrieval team transferred the child to the admitting unit.
- *Other specialist team (non PICU)* identifies that another transport team, not a PICU team (e.g. Accident and Emergency Department (A&E), theatre teams or neonatal teams), transferred the child to the admitting unit.
- *Non-specialist team* identifies that a non-PICU, non-specialist team transported the child to the admitting unit. (e.g. ward staff).

VENTILATION STATUS

Length of ventilation has been calculated in days. Any ventilation episode during the period midnight to midnight was counted as one complete day (e.g. a child intubated and ventilated at 23.45 on 7 March and extubated at 02.30 on 8 March would count as two days of ventilation). Intubation and extubation times are

not recorded in the PICANet dataset therefore more precise ventilation duration times are not available.

STANDARDISED MORTALITY RATIOS

Tables and figures showing the standardised mortality ratios for all units have been reproduced from the National Report so that table and figure numbering is consistent across both reports. These tables include all patients admitted to PICU regardless of age. These ratios are calculated using the recalibrated PIM2, described in the 2013 Annual Report.

ANONYMISATION

From this year onwards regional reports will be anonymised to suppress cell counts less than 5 to prevent the possibility of individuals being identified. In some cases this has led to whole tables or figures being suppressed and a number of other tables having data missing.

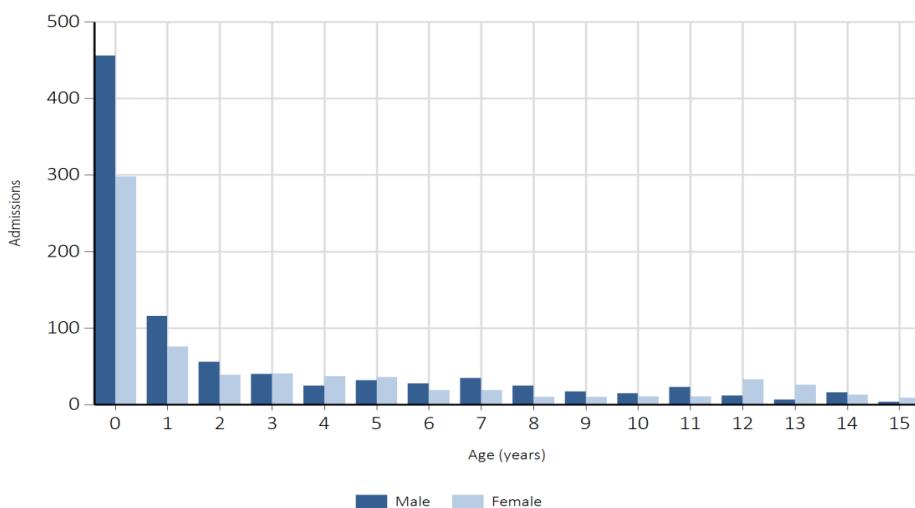

In future years data may be aggregated to prevent the presence of small numbers.

If you require access to the complete versions of the tables a request can be made to PICANet using the standard data request form available on the PICANet website.

TABLE 1 ADMISSIONS BY AGE AND SEX, 2010 - 2012

| Age Years | SEX | | | | | Total n (%) | | |
|--------------------|-----------|-------------|------------|---------------|-----------|----------------|-------------|----------------|
| | Male | | Female | | Ambiguous | | Unknown | |
| | n | (%) | n | (%) | n | (%) | n | (%) |

As in all tables in this report, counts >0 and <5 are replaced by asterisks to ensure confidentiality

Other counts may also be suppressed to make it impossible to calculate the numbers.

TABLE 41 ADMISSIONS BY UNIT DISCHARGE STATUS AND AGE, 2010 - 2012

| Discharge Status | AGE GROUP (YEARS) | | | | | Total | | |
|------------------|-------------------|--------|-----|--------|------|--------|-----|--------|
| | <1 | | 1-4 | | 5-10 | | | |
| | n | (%) | n | (%) | n | (%) | n | (%) |
| Alive | 723 | (47.1) | 411 | (26.8) | 252 | (16.4) | 148 | (9.6) |
| Dead | 30 | (50.0) | 19 | (31.7) | 5 | (8.3) | 6 | (10.0) |
| Unknown | ** | (**) | 0 | (0.0) | 0 | (0.0) | 0 | (0.0) |
| Total | ** | (**) | 430 | (27.0) | 257 | (16.1) | 154 | (9.7) |
| | | | | | | | ** | (**) |

As in all tables in this report, counts >0 and < 5 are replaced by asterisks to ensure confidentiality

Other counts may also be suppressed to make it impossible to calculate the numbers.

TABLE 42 ADMISSIONS BY UNIT DISCHARGE STATUS AND AGE (<1 YEARS), 2010 - 2012

| Discharge Status | AGE GROUP (MONTHS) | | | | | Total | | |
|------------------|--------------------|--------|-----|--------|-----|--------|-----|---------|
| | <1 | | 1-2 | | 3-5 | | | |
| | n | (%) | n | (%) | n | (%) | n | (%) |
| Alive | 248 | (34.3) | 184 | (25.4) | 123 | (17.0) | 168 | (23.2) |
| Dead | 14 | (46.7) | 7 | (23.3) | ** | (**) | 6 | (20.0) |
| Unknown | 0 | (0.0) | 0 | (0.0) | ** | (**) | 0 | (0.0) |
| Total | 262 | (34.7) | 191 | (25.3) | 127 | (16.8) | 174 | (23.1) |
| | | | | | | | 754 | (100.0) |

As in all tables in this report, counts >0 and < 5 are replaced by asterisks to ensure confidentiality

Other counts may also be suppressed to make it impossible to calculate the numbers.

TABLE 43 ADMISSIONS BY UNIT DISCHARGE STATUS AND SEX, 2010 - 2012

| Discharge Status | SEX | | | | | | Total n (%) |
|------------------|------------|------------|---------|---------|-----------|---------|----------------|
| | Male | | Female | | Ambiguous | | |
| | n (%) | n (%) | n (%) | n (%) | n (%) | n (%) | n (%) |
| Alive | 872 (56.8) | 662 (43.2) | 0 (0.0) | 0 (0.0) | 0 (0.0) | 0 (0.0) | 1534 (96.2) |
| Dead | 35 (58.3) | 25 (41.7) | 0 (0.0) | 0 (0.0) | 0 (0.0) | 0 (0.0) | 60 (3.8) |
| Unknown | 0 (0.0) | ** (**) | 0 (0.0) | 0 (0.0) | 0 (0.0) | 0 (0.0) | ** (**) |
| Total | 907 (56.9) | ** (**) | 0 (0.0) | 0 (0.0) | 0 (0.0) | 0 (0.0) | ** (**) |

As in all tables in this report, counts >0 and < 5 are replaced by asterisks to ensure confidentiality

Other counts may also be suppressed to make it impossible to calculate the numbers.

TABLE 44 ADMISSIONS BY UNIT DISCHARGE STATUS AND SEX (<1 YEAR), 2010 - 2012

| Discharge Status | Sex | | | | | | Total (%) |
|------------------|------------|------------|---------|---------|-----------|---------|--------------|
| | Male | | Female | | Ambiguous | | |
| | n (%) | n (%) | n (%) | n (%) | n (%) | n (%) | n (%) |

Note that this Table excludes data from Organisation ZD because it is not possible to identify repeat admissions there.

As in all tables in this report, counts >0 and <5 are replaced by asterisks to ensure confidentiality.

Other counts may also be suppressed to make it impossible to calculate the numbers.

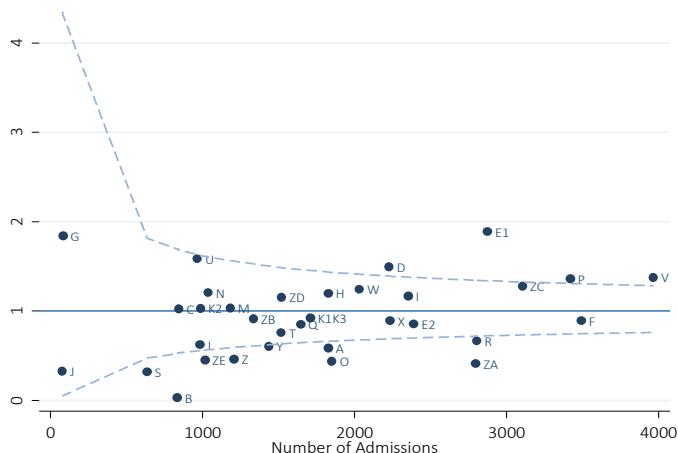

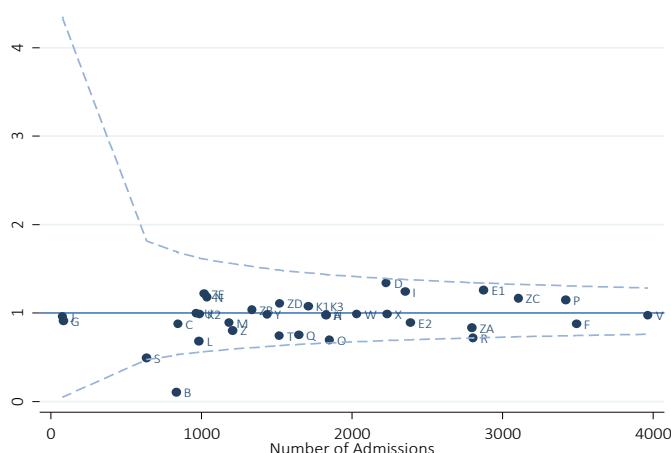

FIGURE 50b PICU STANDARDISED MORTALITY RATIOS BY HEALTH ORGANISATION, WITH 99.9% CONTROL LIMITS, 2010-2012: PIM2r ADJUSTED

*J - The Lewisham Hospital NHS Trust stopped submitting data in August 2010.

TABLE 51 CHILDREN BY FOLLOW-UP STATUS AND AGE, 2010 - 2012

Removed for anonymisation

This table (and 52 -55) now report numbers of children rather than admissions.

The total is the number of children discharged alive from their final PICU admission other than to normal residence.

In future 30 day follow up will be requested for children discharged to normal residence.

As in all tables in this report, counts >0 and <5 are replaced by asterisks to ensure confidentiality

Other counts may also be suppressed to make it impossible to calculate the numbers.

TABLE 52 CHILDREN BY FOLLOW-UP STATUS AND AGE (<1 YEAR), 2010 - 2012

| Age Group (Months) | 30 DAY FOLLOW-UP STATUS | | | | | | Total n | Total % |
|-----------------------|-------------------------|--------|------|-------|---------|--------|------------|------------|
| | Alive | | Dead | | Unknown | | | |
| | n | % | n | % | n | % | | |
| < 1 month | 157 | (84.0) | ** | (**) | 26 | (13.9) | ** | (**) |
| 1-2months | 129 | (93.5) | ** | (**) | 8 | (5.8) | ** | (**) |
| 3-5 months | 63 | (81.8) | 0 | (0.0) | 14 | (18.2) | 77 | (14.8) |
| 6-11 months | 89 | (75.4) | ** | (**) | 28 | (23.7) | ** | (**) |
| Total | 438 | (84.2) | 6 | (1.2) | 76 | (14.6) | 520 | (100.0) |

As in all tables in this report, counts >0 and < 5 are replaced by asterisks to ensure confidentiality
 Other counts may also be suppressed to make it impossible to calculate the numbers.

TABLE 53 CHILDREN BY FOLLOW-UP STATUS AND SEX, 2010 - 2012

| Sex | 30 DAY FOLLOW-UP STATUS | | | | | | Total | |
|---------------|-------------------------|---------------|-----------|-------------|------------|---------------|------------|---------------|
| | Alive | | Dead | | Unknown | | | |
| | n | % | n | % | n | % | n | % |
| Male | 573 | (88.3) | ** | (**) | 73 | (11.2) | ** | (**) |
| Female | 422 | (86.5) | 7 | (1.4) | 59 | (12.1) | 488 | (42.9) |
| Total | 995 | (87.5) | ** | (**) | 132 | (11.6) | ** | (**) |

As in all tables in this report, counts >0 and < 5 are replaced by asterisks to ensure confidentiality
 Other counts may also be suppressed to make it impossible to calculate the numbers.

TABLE 54 CHILDREN BY FOLLOW-UP STATUS AND SEX (AGE <1 YEAR), 2010 - 2012

Removed for anonymisation

As in all tables in this report, counts >0 and < 5 are replaced by asterisks to ensure confidentiality
Other counts may also be suppressed to make it impossible to calculate the numbers.
