ACKNOWLEDGEMENTS

The ongoing success of this international clinical audit is dependent on the hard work and commitment of a large number of individuals working within the paediatric intensive care community. We are very grateful to all the audit clerks, secretaries, nurses and doctors who support and contribute to the Paediatric Intensive Care Audit Network (PICANet) from their own paediatric intensive care units (PICUs).

PICANet was established in collaboration with the Paediatric Intensive Care Society (PICS) and their active support continues to be a key component of our successful progress. The PICANet Steering Group (SG) has patient, academic, clinical, government and NHS members all of whom are thanked for their continuing assistance and advice. Members of the Clinical Advisory Group (CAG) provide a formal interface between PICANet and clinical care teams and their valuable support and contribution is gratefully acknowledged.

We are also grateful for the support and commitment given by members of the PIC Families Group.

The PICANet Audit is commissioned by the Healthcare Quality Improvement Partnership (HQIP) as part of the National Clinical Audit Programme (NCA). HQIP is led by a consortium of the Academy of Medical Royal Colleges, the Royal College of Nursing and National Voices. Its aim is to promote quality improvement, and in particular to increase the impact that clinical audit has on healthcare quality in England and Wales. HQIP holds the contract to manage and develop the NCA Programme, comprising more than 30 clinical audits that cover care provided to people with a wide range of medical, surgical and mental health conditions. The PICANet Audit is funded by NHS England, NHS Wales, NHS Lothian/National Service Division NHS Scotland, the Royal Belfast Hospital for Sick Children, The National Office of Clinical Audit (NOCA), Republic of Ireland and HCA Healthcare.

EXECUTIVE SUMMARY

This report provides information on all 1,687 children under 16 years admitted to paediatric intensive care in the United Kingdom and the Republic of Ireland, between 1 January 2012 and 31 December 2014, whose usual place of residence is Wales.

- About half of admissions for Welsh children were to the paediatric intensive care unit at Cardiff the majority of admissions outside Wales are to Liverpool and Bristol PICUs.
- Over half of admissions were classified as due to either a cardiovascular (32%) or respiratory (29%) diagnosis.
- Nearly six out of ten admissions were 'unplanned – other' i.e. not following surgery.
- Age specific prevalence was 99 (95%CI: 94-103) admissions per 100,000 children annually in Wales between 2012 and 2014.
- 10,015 bed days were provided for Welsh children treated in paediatric intensive care, nearly two thirds of which were provided for children under one year of age.
- Crude mortality for Welsh children treated in paediatric intensive care was 4.6%, compared with 3.7% in the United Kingdom and the Republic of Ireland from 2012-2014.

DATA INCLUDED

This report is based on children admitted to paediatric intensive care units in the United Kingdom or Wales whose usual place of residence is Wales. This is the tenth PICANet Report for Wales.

The data are presented for the three year period January 2012 – December 2014. All data are based on admissions aged 0 – 15 years unless clearly stated otherwise.

This report should be read in conjunction with the National Report of the Paediatric Intensive Care Audit Network National Report January 2012 - December 2014 (published November 2015: Universities of Leeds and Leicester.), which may be accessed at www.picanet.org.uk.

ADMISSIONS BY PRIMARY DIAGNOSTIC GROUP

The primary reason for admission has been categorised into 13 diagnostic groups to enable a simple comparison between organisations. The classification is based on CT3 (The Read Codes). The groups are mutually exclusive:

- Infection excludes any respiratory or gastrointestinal infection but includes meningitis.
- Neurological disorders include neurovascular complications.
- Oncology includes neuro-oncology (brain tumours).
- Other includes those diagnoses not covered by the other 12 groups.

Read codes are five characters in length and can be made up of numbers, letters, or periods. The ordering of the individual characters does not indicate the hierarchy (e.g. patent ductus arteriosus (P70..) is a subset of congenital abnormality of ductus arteriosus (Xa6aC)).

ADMISSIONS BY ADMISSION TYPE

We have used the following definitions for admission type:

- An admission that is *planned - following surgery* is one that the unit is aware of before the surgery begins or one that could have been delayed for 24 hours without risk (e.g. spinal surgery).
- An admission that is *unplanned - following surgery* is one that the unit was not aware of before surgery began and one that could not have been delayed without risk (e.g. bleeding tonsillectomy).
- A *planned - other* admission is any other planned admission that is not an emergency (e.g. liver biopsy).
- An *unplanned - other* admission is one that the unit was not expecting and is therefore an emergency admission (e.g. status epilepticus).

Surgery is defined as undergoing all or part of a procedure or anaesthesia for a procedure in an operating theatre or anaesthetic room. Patients admitted from the operating theatre where surgery is not the main reason for admission (e.g. a patient with a head injury who is admitted from theatre after insertion of an ICP monitor) are not included here. In such patients the main reason for admission is head injury and thus the admission type would be *unplanned - other*.

RETRIEVAL DATA

Data are collected on whether or not a child was retrieved / transferred into the PICU. We have used the following definitions:

- *Own team* identifies that the team from the admitting hospital collected the child from the referring hospital.

- *Other specialist team (PICU)* identifies that another PICU retrieval team transferred the child to the admitting unit.
- *Other specialist team (non PICU)* identifies that another transport team, not a PICU team (e.g. Accident and Emergency Department (A&E), theatre teams or neonatal teams), transferred the child to the admitting unit.
- *Non-specialist team* identifies that a non-PICU, non-specialist team transported the child to the admitting unit. (e.g. ward staff).

VENTILATION STATUS

Length of ventilation has been calculated in days. Any ventilation episode during the period midnight to midnight was counted as one complete day (e.g. a child intubated and ventilated at 23.45 on 7 March and extubated at 02.30 on 8 March would count as two days of ventilation). Intubation and extubation times are not recorded in the PICANet dataset therefore more precise ventilation duration times are not available.

STANDARDISED MORTALITY RATIOS

Tables and figures showing the standardised mortality ratios for all units have been reproduced from the National Report so that table and figure numbering is consistent across both reports. These tables include all patients admitted to PICU regardless of age. These ratios are calculated using the recalibrated PIM2, described in the 2015 Annual Report.

OVERVIEW OF THE WELSH 2012-2014 DATA ANALYSIS

Here we provide an overview of the main findings from the Welsh report and demonstrate how PICANet supports Quality Standards reporting.

Where table numbers are given in **bold** with the prefix **WR** they correspond to the data shown in the Tables and Figures section of the Welsh report.

Admissions

Between 2012 and 2014 1,687 admissions for children under 16 were recorded in the PICANet dataset; 559 admissions in 2014. Of those 874 (52%) [**WR Table 1**] were for children under one year of age at admission and one third of those was less than a month old at admission (288; 33%) [**WR Table 2**]. Males made up a slightly higher percentage of admissions than females (989; 59% vs 697; 41%).

There is a marked variation in case-mix between organisations measured by risk of mortality on admission using the Paediatric Index of Mortality (PIM2) (Figure 1) [**WR Table 11**]. Much of this variation is explained by the geographical location of PICUs and whether onsite high dependency care services are available.

Figure 1 Paediatric Index of Mortality (PIM2) expected risk of mortality group by health organisation, 2012-2014

There is seasonal variation in the number of admissions to PICUs with higher admissions generally seen in the winter months of November to January [WR Table 6]. This is mostly explained by the peak in respiratory admissions during this period especially seen in those under 1 year of age [WR Figure 8]. Over half of admissions are classified as either cardiovascular (538; 32%) or respiratory (483; 29%) [WR Table 16]. Diagnosis patterns change with age (Figure 2) with cardiovascular the most common reason for admission in under 1s (41%), respiratory in 1-4 year olds (33%), cardiovascular in 5-10 year olds (23%) and musculoskeletal in those aged 11-15 (23%). There is a difference with the overall figures, in which the most common reason of admission in those aged 5-10 is respiratory.

Figure 2 Percentage of most common primary diagnostic groups by age group, 2012-2014

As in previous years, over half of the admissions to PICUs are unplanned with significant variation by organisation [WR Table 13]. Diagnostic group varied by admission type [WR Tables 19-22] (Figure 3). Thirty-nine per cent of unplanned, non-surgical admissions had a respiratory diagnosis [WR Table 22].

Figure 3 Percentage of admissions for each diagnostic group by admission type, 2012-2014

Interventions

Four out of five children received invasive ventilation at some point during their admission in 2012-2014 [WR Table 29]. Sixty six percent of children admitted to PICU receive invasive ventilation only, with 4% receiving non-invasive ventilation only and 15% receiving both during their admission [WR Table 30]. After ventilation, vasoactive drugs are the most common intervention (37%) [WR Table 29].

Bed activity and length of stay

In the three year period of this report, over 10,000 bed days of paediatric intensive care were delivered by PICUs contributing data to PICA Net, two thirds of which were to children <1 year of age [WR Table 33]. Twenty four percent of patients have a length of stay of less than 24 hours and a further 34% stay between one and three days. Seventeen percent of patients stay in the same PICU unit for more than 7 days [WR Table 40]. The PICS standard below relates to bed occupancy:

PICS Standard		Demonstration of compliance
180	Average occupancy on the unit should not exceed 80%. The unit should be monitoring occupancy and there should be evidence of escalation within the Hospital and involvement of Health Boards/Commissioners if occupancy exceeds 80% for more than two successive months.	Occupancy monitoring information. Evidence of escalation and Health Board/Commissioner involvement if required.

Individual children

Four out of five children admitted to PICU in 2012-2014 had a single admission, multiple admissions were most common in children with body wall and cavities (23%) and cardiovascular (21%) diagnoses on their first admission and least common in those with trauma (0%) *[WR Table 59]*. There is a difference with the overall figures in which multiple admissions were most common in children with cardiovascular and multisystem diagnoses.

Overview

As with the PICANet annual report across all countries, the Welsh report provides a rich dataset which can be used to evaluate organisational performance against measurable standards. The dataset is continually reviewed and developed leading to the collection of new data items and new datasets. The recently developed ability for customised data collection allows PICANet to respond to audits which are clinically relevant but where information may not be fully captured through the core dataset or where additional data collection is needed at short notice e.g. If extra information is needed during a specific disease outbreak or public health emergency. PICANet is actively engaging and collaborating with key stakeholders including clinicians, commissioners and families to collect relevant and accurate information for the purposes of audit.

TABLE 51 WELSH CHILDREN BY FOLLOW-UP STATUS AND AGE, 2012 - 2014

Age Group	30 DAY FOLLOW-UP STATUS							
	Alive		Dead		Unknown		Total	
	n	%	n	%	n	%	n	%
<1 year	496	(82.7)	9	(1.5)	95	(15.8)	600	(47.1)
1-4 years	280	(87.0)	**	(**)	40	(12.4)	**	(**)
5-10 years	178	(91.8)	**	(**)	15	(7.7)	**	(**)
11-15 years	136	(85.5)	**	(**)	20	(12.6)	**	(**)
Total	1,090	(85.5)	**	(**)	170	(13.3)	**	(**)

This table (and 52 -55) now report numbers of children rather than admissions.

As in all tables in this report, counts >0 and < 5 are replaced by asterisks to ensure confidentiality

Other counts may also be suppressed to make it impossible to calculate the numbers.

TABLE 52 WELSH CHILDREN BY FOLLOW-UP STATUS AND AGE (<1 YEAR), 2012 - 2014

Age Group (Months)	30 DAY FOLLOW-UP STATUS							
	Alive		Dead		Unknown		Total	
	n	%	n	%	n	%	n	%
< 1 month	147	(80.3)	**	(**)	35	(19.1)	**	(**)
1-2months	136	(86.6)	**	(**)	17	(10.8)	**	(**)
3-5 months	98	(86.7)	**	(**)	13	(11.5)	**	(**)
6-11 months	115	(78.2)	**	(**)	30	(20.4)	**	(**)
Total	496	(82.7)	**	(**)	95	(15.8)	**	(**)

As in all tables in this report, counts >0 and < 5 are replaced by asterisks to ensure confidentiality
Other counts may also be suppressed to make it impossible to calculate the numbers.

TABLE 53 WELSH CHILDREN BY FOLLOW-UP STATUS AND SEX, 2012 - 2014

Sex	30 DAY FOLLOW-UP STATUS							
	Alive		Dead		Unknown		Total	
	n	%	n	%	n	%	n	%
Male	633	(86.2)	5	(0.7)	96	(13.1)	734	(57.6)
Female	457	(84.5)	10	(1.8)	74	(13.7)	541	(42.4)
Total	1,090	(85.5)	15	(1.2)	170	(13.3)	1,275	(100.0)

TABLE 54 WELSH CHILDREN BY FOLLOW-UP STATUS AND SEX (AGE <1 YEAR), 2012 - 2014

Sex	30 DAY FOLLOW-UP STATUS							
	Alive		Dead		Unknown		Total	
	n	%	n	%	n	%	n	%
Male	295	(84.3)	**	(**)	52	(14.9)	**	(**)
Female	201	(80.4)	6	(2.4)	43	(17.2)	250	(41.7)
Total	496	(82.7)	**	(**)	95	(15.8)	**	(**)

As in all tables in this report, counts >0 and < 5 are replaced by asterisks to ensure confidentiality
Other counts may also be suppressed to make it impossible to calculate the numbers.
